Greetings all.

Please find below the daily progress report on work items contained within the recently approved AOC.

ACTIONS PERFORMED AND DEVELOPMENTS ANTICIPATED**Cell 6 assessment:**

1) The south portion of the west side assessment of cell E6 is ongoing. The operations layer of protective stone located above the anchor trench will be removed to allow the liner material to be further investigated. The assessment should be completed by this Saturday.

Western Storm water Diversion Project (to render functional):

1) Diversion Structure: The contractor is resetting the wall forms and continues installing reinforcing steel rebar, in anticipation of pouring additional concrete wall material on Wednesday.

2) Box Culvert: The contractor has continued placing structural steel forms in the bottom and walls of the open box culvert in preparation for invert pours on Tuesday and Friday.

3) Pipe: The contractor completed excavating the Hobas pipe trench and continues placing bedding (aggregate below pipe). Pipe placement will commence on Tuesday.

Cell 6 Leachate Riser Restoration:

1) The pumping contractor continues removing water from the water surface.

2) The contractor has lowered the silt from the south pond area by an additional 2 feet.

Sediment Basin:

1)The contractor pumped 274,000 gallons of storm water from the sedimentation basin from Saturday thru Monday, which was sent to the WWTP for treatment and disposal.

ANALYTICAL DATA RECEIVED DURING REPORTING PERIOD - None

ANTICIPATED PROBLEMS AND PLANNED RESOLUTIONS – None

Please let me know if you have any questions.

Best regards,

Joe Whelan
